

PARK HILLS CIVIC ASSOCIATION

SILVER SPRING, MARYLAND

10 October 1949

Dear Neighbor:

Please reserve Wednesday evening, October 12, for the first fall meeting of the Park Hills Civic Association. It's a real double feature. First will be shown an excellent film on atomic energy developments entitled "God and the Atom". Next will be a period of discussion of problems of Montgomery County in general and our own community in particular.

Now that we know with certainty that Russian scientists have developed an atomic bomb, the question of atomic energy in all its aspects takes on increased interest and importance. Our film promises to be enlightening and we feel sure that each of you will enjoy seeing it.

All communities have their problems but those that grow as rapidly as Silver Spring seem to have the lion's share. Some of these will be discussed Wednesday. For instance, what are your opinions on where a community and school auditorium should be built? Are you satisfied with the naming of the streets and the signs we have? How about a recreation project, a lighted stadium, the parking situation on Sligo Parkway and many others? There will not be time for all of these at this meeting but it gives you an idea of future programs.

Please make plans to attend Wednesday, at 8:00 P.M.
Place - Recreation House at 125 Dale Drive. Remember, women are especially invited to attend this meeting.

Sincerely,

B. R. Stanerson
Secretary
